Guadalupe
Glass Mountains

1968
Left Washington 8:30; Left Baltimore 10:00 A.M.; arrived Denver 12:30 A.M. Denver 2:30; arrived Pine Springs Camps about 10:30 A.M. on March 31, March 31.

Went first to D. Rankle Headquarters and reported there. Explained Negley and Lawrence NE at D.R. Headquarters. Found nothing of value. Went back to 728'-p. for detail. Took 10. The fossiliferous bed (in line) forms the top of a bench at the base of the cliff and about 12' above the exposed base of the cliff.

April 1.

Damped with rain. After lunch went 31' from road leading to D. Rankle Headquarters. Detached off about 1 mile S.E. junction with US 62-180 and followed this for 3/4 miles S.E. Examined the limestone bands mapped by King but found no satisfactory fossil bed anywhere along this stretch. Along this line, the fossil beds seemed quite thin and not always continuous. Very disappointing. At end of day revisited 728.'

Petrol 2'Bw of 728'-p. 1c of 728'-p. 728'-p. 1c of 728'-p. 2c. 'Benfield Pressed 728'-p. Spring—near Negley—over
140 b = stream bed 1/4 miles NE of D Ranch Headquarters, Delaware Basin, Texas.
April 2
732A-ibble cuneal hill 5406. About 10 feet below top a thin bed alternating in ammonites. Brooch jade in line. One forming crest of hill. The limestone on The hilltop are the only ones containing fossils, consequently the slope under the limestone is a safe place to collect. From 10 pieces.
731-Only fossils are pieces of quality on N.E. nose of hill. Also, there Waagenoceras was common. 5 blocks.
740A -small hill capped by Heglows. Fossils in limestones in lower part and also mean top of hill. 3 blocks.

April 3
740A - on bluff on east side road just N.E. of 732A. Heglows with fossils. Lower part fossiline. 10 blocks.
740E - left away is on west side knob just off pipe-line road
740F - South Wally black is on W side of road at Long Point
April 3
Pitines April 3 - in basin of 732A
Black & white & color.

April 4
635 places near of Electric Station on
Rodel Peak on ½ mile. 725 ft bed
on W side ridge due S of Highland
R. house. Full of Boychuck
6 blocks.

April 5
740 g - Capitan reef lithology
above Piney. Probably Ralston
in age.

740 h - Rostert = Capitan reef rocks
in contact with black liners. Foam
Reef contact on broken dauber
with pieces of dark liners tone in
the reef.

April 7
740 j - Same hill as 725 ft but on
north side of hill. Check 725 ft
and.

April 8
Packed & shipped blocks. -
went up spur just east
of Good Shepherd Peak.
740 K & 740 L
P.K. Wiley, Van Horn, ships some fossils
handled by Jack Taylor.

April 10
Arrived Marathon 3:00 PM. Hotel
full, stayed in Alpine.
Mileage 25689.

Carved 1. Appel
Boy 627
Ozona, Texas
and 5 I Book, C.E. paper.

April 11
Returned to House with Mr. Van Horn.
Motel. Met Mr. Appel on ranch
with Split Fankas. Rained out.

April 12
Rain in early morning, went back
to Appels for dishes. Visited 7260
for oriental pieces. Looked at 720 e.

Mr. R.K. Wiley, Van Horn, Texas
received our blocks for shipment

April 13
Went out to Hess Ranch in
morning, went to Debe Ranch
in afternoon.
April 14.
To Neal Ranch in morning.
Ammonites at 727d might be
reworked. Collected more 727c,
place exhausted.
Afternoon went to see ammonite
beds in Eriogon Mtn. area, collected
more 732f.

April 17.
Yucca Canyon about 300' above
floor, 746m
740' south side Yucca Canyon
at entrance about 300' above
floor.
